## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Judd (US Patent 6,160,514).

Judd discloses, in figure 2, an antenna system for indoor wireless communications comprising a first antenna 32 installed behind a first wall surface 29 of a wall 22, a second antenna 34 installed behind a second wall surface 28, a third antenna 36 installed behind a third wall surface 30, wherein the first wall surface 29 and third wall surface 30 form an angle at the protruding corner. Figure 6 shows the first antenna 32, the second antenna 34, and the third antenna 36 electrically connected to a RF unit 72.

Claims 1, 13 are rejected under 35 U.S.C. 102(e ) as being anticipated by Judd (US Patent 6,160,514).

Judd discloses, in figure 2, an antenna system for indoor wireless communications comprising a first antenna 32 installed behind a first wall surface 29 of

a wall 22, a second antenna 36 installed behind a second wall surface 30, wherein the first wall surface 29 and second wall surface 30 form an angle at the protruding corner.

***Allowable Subject Matter***

Claims 7-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 14-18 are allowed.

Claim 14 recites an antenna system comprising a first antenna structure installed to pass through a selected wall in a building construction, the first antenna structure having a sliding structure that is adjusted according to the thickness of the wall.

None of the prior arts shows or suggests this antenna system.

The patents to Saito et al, Frecska, Takatori et al, Kurby, and park are cite as of interest showing the antenna similar to that disclosed.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Ho whose telephone number is (571) 272-1822.
